OHANA INSIGHTS MARINE COMMUNITY UPDATES AND STORIES

HAPPY
THANKSGIVING
FROM
OHANA MILITARY
COMMUNITIES

OMC Residents donated over 718 pounds of food to Hawaii Foodbank for our October 2020 Helping Hands event. A very big Mahalo to all those who donated.

Our President's Message

As the end of the year rapidly approaches, HMC will spend November honoring our veterans and their families. November 11th is an important day for us to pay tribute to those who have served our country. In honor of this, we launch our 2nd annual "30 Days for 30 Families" initiative. We are asking for you to submit stories of veterans which we will feature across our social media platforms throughout the month. These powerful stories are being collected and will be placed in a commemorative book. November and the Thanksgiving season gives us all a chance to pause and count our blessings. At HMC we remain very thankful for the families who live within our communities and for the opportunity to serve you. We were particularly moved by everyone's generosity in October as our Helping Hands program gathered food for more than 36 Food Banks throughout the country. Our heartfelt thanks to you and your families.

Turkey Safety Tips

SAFELY THAW YOUR TURKEY: Thaw turkeys in the refrigerator in a container, or in a leak-proof plastic bag in a sink of cold water that is changed every 30 minutes. When thawing a turkey in the microwave, follow the microwave oven manufacturer's instructions. Never thaw your turkey by leaving it out on the counter. A thawing turkey must defrost at a safe temperature. When the turkey is left out at room temperature for more than two hours, its temperature becomes unsafe. Bacteria can grow rapidly in the "danger zone" between 40°F and 140°F.

SAFELY HANDLE YOUR TURKEY: Raw poultry can contaminate anything it touches with harmful bacteria. Follow the four steps to food safety – cook, clean, chill, and separate – to prevent the spread of bacteria to your food and family.

SAFELY COOK YOUR TURKEY: Set the oven temperature to at least 325°F. Place the completely thawed turkey with the breast side up in a roasting pan that is 2 to 2-1/2 inches deep. Cooking times will vary depending on the weight of the turkey. To make sure the turkey has reached a safe internal temperature of 165°F, check by inserting a food thermometer into the center of the stuffing and the thickest portions of the breast, thigh, and wing joint. Let the turkey stand 20 minutes before removing all stuffing from the cavity and carving the meat. **Source: CDC.gov**

Thanksgiving Cooking Safety:

COMMON KITCHEN ACCIDENTS

1. **Cooking Fires:** According to the NFPA, roughly 34 percent of home fires are related to leaving food unattended while it's cooking. These fires are also some of the most dangerous and contribute to nearly 27 percent of fire-related injuries each year. For this reason, it's best to keep an eye on things when you have food cooking on the stovetop or in the oven.
2. **Turkey-Fryer Burns:** Some families prefer to deep-fry their turkeys on Thanksgiving, a process that has become notorious for causing fires and severe burns. With high temperatures and a substantial amount of combustible cooking oil, this process is so dangerous that the NFPA encourages people to use restaurants or grocery stores to fry their turkeys.

VETERANS DAY

— Honoring All Who Served —

"In November of 1919, President Woodrow Wilson proclaimed November Eleventh as the first commemoration of Armistice Day with the following words: "To us in America, the reflections of Armistice Day will be filled with solemn pride in the heroism of those who died in the country's service and with gratitude for the victory, both because of the thing from which it has freed us and because of the opportunity it has given America to show her sympathy with peace and justice in the councils of the nations..."
